ANNOUNCEMENT

The project - „Transnational cooperation initiative fostering developing forward thinking skills of students, teachers and workforce in sustainability-relevant sectors posed by Business 4.0 trends through innovation in Business& Engineering education and training”, organized through the ERASMUS+ programme, will organise a short-term teacher-training during the aforementioned period.

The training aims to:

- Build a multicultural learning experience enriched with feedbacks and insights gathered from the testing phase Educational Initiative.
- It supports teachers to augment educational resources with tested and improved practices on sustainable learning for digital and advance skills development.
- Enabling a shared vision on complex skills development for Business 4.0.

The benefits for selected teacher/ trainers are:

- Better familiarized with Business 4.0 concept in teaching and learning process.
- Empowers participants with cross-disciplinary and multicultural views on improving the quality of teaching.
- Facilitating professional development and a better adaptation of educational content to the digital transformation of work.
- It increases synergies between education and world of work and enables the development of genuine educational resources in various sustainability-related topics.

The training will be led by expert trainers in business and international university co-operation and will be deployment on 5 (five) training days, with mix of presentations, discussions, and workshops:

For higher education institutions involved the event represents a meaningful opportunity to develop and modernize courses and syllabus, for developing international collaboration via digital learning and expanding the use of Business 4.0 elements.

Each partner has allocated 2 positions for this event, for teachers/ staff employed in the organisation, based on selection.

Eligible participants: teachers and training staff from the project consortium
